What Is the Ideal Vision Institute?
Ideal Vision Institute is designed to catapult doctors past the initial steps of adding vision therapy to their practice, or to start a VT only practice.
You'll learn a proven method of testing, diagnosing and treating the most common VT patients, using easily available equipment and using activities that you'll feel confident doing.
The course is 6 days, 3 each over two weekends, separated by about 2 months. The reason? So you can start working with patients immediately. By the time you'll want to move the patient forward in therapy, the second weekend will cover the more advanced methods of testing and treatment.

Unique content and approach
Ideal Vision Institute includes unique and original instructional materials that will transfer the instructor's skills in a systematic and clearly understandable way.
You'll also get an introduction to how to communicate the vision therapy message to the parents and patients in your chair. Plus learn to fit VT into your present setting, or how to do a therapy only startup.
By day 6, you'll have what you need to get started with the most rewarding of all specialties, vision therapy. The focus in on the most common of binocular vision problems, the "meat and potatoes" of any VT practice.

Why Enroll in this clinical course?
You’ll be able to lift yourself out of managed care hamster wheel; into the happy field of VT, where you need not accept insurance.
More importantly, you'll help patients whose lives and futures you have changed for the better. Your years in vision therapy will be professionally and personally rewarding.

Ideal Vision Institute
A Quick-Start Course in Vision Therapy

July 13-15, 2018
September 14-16, 2018
At the office of
Phillip Bugaiski, O.D. FCOVD
10210 Berkeley Place Drive
Suite 200
Charlotte, NC

A practical clinical course designed to get you started in vision therapy. Starts where you are now and builds a solid clinical foundation.

Tens of millions of unserved patients
Only a few thousand ODs offer VT
Freedom from managed care
The most profitable of all specialties
About Ideal Vision Institute’s Quick Start Course

The course takes place over two, 3-day weekends. They take place in vision therapy offices where patients are seen regularly.

The first weekend covers in-chair testing using unique “Test Grids,” that identify the nature of the test, their diagnostic significance and how problems manifest as behavior. Then participants go through detailed training on basic activities.

The second weekend covers perceptual testing and more advanced therapy activities.

Instructors share their professional approach to testing, case presentation and therapy.so you can apply what you learn immediately,

IVI materials include significant diagnostic and therapist training details.

Test Grids transfer understanding testing to both O.D. and therapists.

All IVI materials were designed specifically for doctors to use for training new staff as you grow, and to enable you to review and refresh your understanding of VT.

What should you expect from the Ideal Vision Institute’s Quick Start VT Course

Class gathers round to learn how to perform a VT activity from the Ideal Vision Institute curriculum. This is part of the full system for testing, diagnosing and treating the most common type of patient.

How to generate, test, diagnose and treat “Sweet Spot Kids.” The category that should make up the bulk of patient.s

An organized and proven system of therapy you can start using with patients immediately.

The confidence you need to get over the first hurdle for all new VT ODs, “How do I get started and do a good job with patients.”

Exactly what tests to perform, how to do them and how to understand what the results mean so you can plan therapy.

A place where you and your therapists can get trained in the same way at the same time..

Learn to communicate the VT message so that parents and patients know vision is the problem and you have the solution.

Access to instructors and support people with nearly a century of experience in the field..

Instructional materials you will be able to use to develop more therapists, created newly just for this course.

How to turn testing into a powerful case presentation.

Guides and help with the mechanics and business of starting VT.

The instructors and support team boast more than half a century of experience in vision therapy. Both the clinical and business side are covered so you can start your therapy practice immediately.

Hands on training in how to do the activities for doctor and therapist.
