## How to get the most from your breakthrough course...

Our course is based on the consultation and training we offer our clients, but are more focused and detailed in nature. The course includes training, practice and coaching, not just theory. The objective is that by the end of the course, you and your assistant will possess the ability to apply what you've learned starting your first day back in the office. You will also receive and learn to use our forms, PR materials, flyers and our powerful demonstrations.

***Take a moment to fill out this questionnaire about your practice and your plans for doing more with VT. Although our courses are focused on specific aspects of VT practice development, we plan to address selected other issues that may be of concern to participants. Here is a list of the concerns we most commonly encounter among doctors who provide, or want to offer, vision therapy services.***

### **What is your biggest frustration with the therapy, or other aspects of your practice?**

Please check all that apply, circle any specific problems you encounter on the list, then add your own comments.

- Frustrated by people who walk away needing VT, not getting the help they need (Low sign-up rate).
- Lack of public knowledge of the value of therapy; educators/professionals unaware of VT.
- Dealing with insurance, scheduling and payment issues.
- Managed care/3<sup>rd</sup>-party makes it very difficult to make vision therapy work.
- Don't have enough time with each patient to present therapy effectively.
- I would like to have more freedom to spend time with family or doing something else.
- Reports take too much time and trouble – often late or not done at all.
- Marketing, referral networking, community outreach doesn't seem to get done or is hit and miss.
- I have tried a lot of things to promote therapy, but they don't seem to be effective or to last.
- Staff problems (circle) conflicts, bickering, uncooperative, poor teamwork, complaining, won't take responsibility, lack of training, constantly miss details, make too many mistakes, sabotage VT.
- VT case load see-saws up and down.
- Practice net income is low.
- Have no clear action plan; not quite sure where to start or exactly what to do.
- Can't seem to juggle all the details.

### **Are there any frustrations you are experiencing that are NOT listed?**
